KESTREL WEATHER METERS

Kestrel weather meters with integrated **Bluetooth®** wireless technology. The ultimate in portable and accurate environmental condition monitoring

The entire Kestrel 4000 series is now available with integrated **Bluetooth®** wireless technology including the night vision (NV) models.

Now, both real-time and logged data can be transferred wirelessly and automatically to a laptop or PDA.

This enables long-term storage of data, further analysis and detailed charting. In many instances, key environmental measurements from a Kestrel instrument are input into other systems - ballistics calculators, fire behaviour models, hazmat plume predictors, heat stress models, weather reports, research data sets and more.

Advantages of **Bluetooth®** wireless technology:

- Streamline your work and reduce your equipment in the field - wireless data transmission eliminates the need for a separate PC Interface and cabling.
- Every Kestrel **Bluetooth®** weather meter includes custom communication software designed to quickly and easily configure your data transmission frequency, download logged data, graph data, and transfer data to other applications.
- Data transmission range adjustment allows you to maximise power to communicate with your Kestrel at up to a 30 feet range, or reduce power for closer, more secure operation.
- Individual unit ID's ensure you pair with the Kestrel you want, even when more than one system is operating in the same area.
- Permanently coded unique 4-digit Pin numbers provide extra security when pairing and transmitting data.

Kestrel 4000

Available in Safety Orange and Grey
Pocket Weather Tracker

Ideal For:
School projects
Aviation
Outdoor Pursuits

Kestrel 4000NV

Available in Olive Drab and Desert Tan
Pocket Weather Tracker

Ideal For:
Target shooting
Military usage

Kestrel 4200

Available in Safety Orange
Pocket air flow tracker

Designed for:
De-humidification, HVAC & facilities management professionals

Kestrel 4250

Available in Safety Orange
Racing weather tracker

Designed for:
Motor racing professionals & enthusiasts
With Relative Air Density and Density Altitude

Kestrel 4300

Available in Lime Green
Construction weather tracker

Designed for:
Construction & concrete installation professionals

Kestrel 4500

Available in Yellow
Pocket weather tracker with direction

Ideal For:
Research
Portable weather stations

Kestrel 4500NV

Available in Olive Drab and Desert Tan
Pocket weather tracker with direction

Ideal For:
Use in low light where protecting your night vision is important.
